

# ALPHA WS-809 WATER SOLUBLE SOLDER PASTE

## DESCRIPTION

**ALPHA WS-809** is a SnPb, water-soluble solder paste which is designed for a broad range of SMT processes where aqueous post reflow cleaning is required.

## FEATURES & BENEFITS

- Excellent volume transfer efficiency over broad range of environmental conditions
- Fine-pitch printing with consistent shape and volume to 16 mil pitch QFP (63x10x5 mil deposits) and 15 mil circles (BGA225)
- High throughput and yield with consistent print volumes at print speeds ranging from 1 – 6 inches/second
- Exhibits resistance to slumping and drying at temperature up to 66 – 84°F (19- 29°C) and relative humidity extremes (35%-65% RH)
- Water cleanable after two paste reflow cycles
- Excellent low voiding performance that exceeds IPC Class III requirement
- Superior solder spread performance on Cu OSP

## PRODUCT INFORMATION

<u>Alloys:</u>	63Sn/37Pb, 62Sn/36Pb/2Ag, NT4S
<u>Powder Size:</u>	89.8% Metal, Type 3 (25-45 µm) / Type 4 (20-38 µm) per IPC J-STD-005)
<u>Packaging Sizes:</u>	500 gram jars, 6" and 12" cartridges
<u>Flux Gel:</u>	Available in 10cc and 30cc syringes for rework applications.

## PRINT CAPABILITY

**ALPHA WS-809** is formulated for both standard and fine feature pitch stencil printing, at print speeds between 1"/sec (25 mm/sec) and 6"/sec (150 mm/sec) with stencil thicknesses of 5 mil (0.125 mm) to 6 mil (0.15 mm), particularly when used in conjunction with ALPHA® Stencils. Blade pressures should be between 1 – 2 lbs/in (0.16 – 0.34 kg/cm), depending on the print speed. The higher the print speed employed, the higher the blade pressure that is required.

## SAFETY

While the **ALPHA WS-809** flux system is not considered toxic, its use in typical reflow will generate a small amount of reaction and decomposition vapors. These vapors should be adequately exhausted from the work area. Consult the MSDS for additional safety information, and for toxicity data on alloys containing lead and silver.

## SHIPPING AND STORAGE

**ALPHA WS-809** should be stored refrigerated upon receipt at (1 – 10)°C / (34°-50)°F. This will be sufficient to maintain a nominal shelf life. **ALPHA WS-809** should be permitted to reach room temperature before unsealing its package prior to use. Room temperature storage for sealed containers should not exceed 14 days. The shelf-life of refrigerated **ALPHA WS-809** is 6 months.

<ul style="list-style-type: none"> <li>•Refrigerate to guarantee stability @ 0-8°C (32-46°F)</li> <li>•Paste can be stored for 2 weeks at room temperature up to 77°F (25°C) prior to use.</li> <li>•When refrigerated, warm-up paste to room temperature for up to 4 hours. Paste must be ≥66°F (19°C) before processing. Verify paste temperature with a thermometer to ensure paste is at 66°F (19°C) or greater before setup.</li> <li>• Working range: (19 to 29)°C on the stencil.</li> <li>•Do not remove worked paste from stencil and mix with unused paste in jar.
