INSIGNUM 4000 Laser Marker

*Over 40 Years of
Commitment
to Innovation.*

- PCB size 508 × 508mm
- Code size 5 mil
- RGB Lighting
- Good/Bad sorting
- Scan after Print
- Integrated flip station
- CO₂-laser
- MES database connection

This high-end system in the INSIGNUM series laser, convinces with highest precision and a top cycle time of less than 4.9 seconds for a complete marking process including handling. Thanks to an integrated flip-station the machine becomes even more efficient. The complete flip handling takes 1.5 seconds. The INSIGNUM 4000 Laser option OPTIMAP captures several marking positions for marking and verification in one process step. The advantage is that the marking area is ideally exploited and motion is reduced.

Innovation and investment keeps Hi-Tech at the cutting edge of technology and helps maintain our position as an industry leader.
